*The world of ...*

## SANCA FOODS, INC.

SAN CARLOS FARMERS ORGANIZATION & ORGANICALLY DESIGNED SYSTEM, INC.

*A social enterprise engaged in selling organic and clean agricultural products fresh from the farm...*

### *Vision*

*Accessible, quality and industry-based food security for all...*

### *Mission*

*Moving local products to the global supply chain and a leader of profitable food and agricultural production differentiated by quality, freshness and guaranteed safety with sustained market leadership utilizing the community-based approach.*

*The Agricultural Productivity Training Center-2 Processing Center with Post-Harvest Facilities is based in RGC-2, Translink Highway, San Carlos City, Negros Occidental, Philippines. This facility accommodates all of the agricultural processed products under the SanCa brand name.*

## GIFT OF LIFE TECHNOLOGY

*The cluster farming production makes use of protective farming and integrated farming technology called the Greenhouse-based Integrated Farming Enterprise (GIFT) and the Livestock-based Integrated Farming Enterprise (LIFE) which had been proven technologies in the San Carlos area. GIFT is a form of a protective farming technology for the high value crops production to ensure that crops are well-protected against various pests and diseases and weather conditions that could be a hindrance to their productivity and the attainment of potential yield; while LIFE is biased to the establishment of community-based livestock industry as the source of organic material to sustain agricultural-related enterprises on a long-term basis.*
